EXPERIENCE

Travelexic

Apr '23 — Present

Senior Software Developer

Dehradun, India

- Developed and maintained a comprehensive SaaS-based Travel Management Solution (Travelexic), streamlining itinerary planning, document distribution, and operational workflows to enhance efficiency and automation.
- Developed an AI-powered automation tool using Python and Claude AI to streamline document allocation, significantly reducing manual effort and boosting productivity by **70%**.
- Collaborated with cross-functional teams to define requirements and translate them into detailed technical documentation, enhancing efficiency in data processing and file generation workflows.
- Designed and optimized multiple **RESTful APIs** to facilitate **secure, high-performance data exchange** between web and mobile platforms, enhancing system interoperability and responsiveness.
- Integrated **third-party APIs, OCR detection services, Google API integration, AWS services (SES, SNS, S3 Bucket), Payment Gateway APIs, and Client API integrations**, enhancing platform capabilities and automation.
- Led a team of four engineers in designing and developing **critical system components and core functionalities**, improving **scalability, performance, and architectural stability** across projects.

Associate Software Developer

Sep '19 — Mar '23

Dehradun

- Developed and worked on a diverse range of web applications, including a SaaS-based Travel Management Solution, a Real-Time Chat Application, and an Online Examination System with Live Proctoring, ensuring scalability, security, and seamless user experience.
- Managed code merging and version control, maintaining clean, efficient, and well-documented repositories.
- Optimized RESTful APIs to improve performance, scalability, and real-time data exchange, increasing system responsiveness by **30%**.
- Developed RESTful APIs for an Expense Management application, enabling real-time expense recording and settlement, ensuring accuracy and efficiency in financial tracking.

Freelance Software Developer

Sep '18 — Sep '19

Dehradun, India

- Developed and delivered custom web applications for clients, focusing on scalability, security, and user experience.
- Designed and implemented RESTful APIs to facilitate seamless data exchange between applications.
- Created responsive UI/UX designs using HTML, CSS, Bootstrap, and jQuery, ensuring cross-device compatibility.
- Worked closely with clients to gather requirements, define project scope, and deliver high-quality, responsive web solutions within tight deadlines.
- Provided technical consultation and end-to-end project management for businesses seeking web-based solutions.

SKILLS

Languages: PHP, JavaScript, Python, HTML, CSS

Frameworks & Libraries: Laravel, Vue.js, Vuex, Bootstrap, Tailwind

PROJECTS

Travelexic – Complete Travel Management Solution (SaaS) [Link](#)

- **Overview:** Developed a comprehensive SaaS-based Travel Management Solution (CMS) enabling travel agents and suppliers to create and manage tour itineraries, leads, and bookings for their clients. The application includes features like hotel booking, sightseeing management, and itinerary planning.
- **Key Contributions:**
 - Engineered and deployed multiple REST APIs for seamless data exchange between the web platform and Android/iOS apps.
 - Integrated various third-party APIs, enhancing the platform's functionality and user experience.
 - Designed and implemented a multi-role system to accommodate different user functionalities and access levels.
 - Led the deployment of the project on cloud platforms and managed version control and code releases via GitHub.
- **Technologies Used:** Vue.js, Vuex, Laravel, PHP, JavaScript, CSS, Bootstrap, AWS (SES, SNS), Firebase Notifications, GIT, Cron Jobs, MySQL.

Chat Platform – Real-time Messaging System

- **Overview:** Developed a real-time messaging app providing users with a seamless communication experience through various chat options, including Direct Channel Chat, Group Chat, Hub Chat, and Broadcast Chat.
- **Key Contributions:**
 - Implemented real-time communication features using Pusher, ensuring instant message delivery and updates across all user devices.
 - Developed multiple REST APIs to support data exchange and synchronization across different chat modes.
 - Designed a responsive UI using Laravel Blade, CSS, and Bootstrap, ensuring compatibility across all devices.
 - Added user settings and chat customization features, such as profile photo management, dark mode, and chat color personalization.
 - Managed version control and code deployment using GIT, ensuring smooth development and release cycles.
- **Technologies Used:** PHP, Laravel, Blade, Pusher, CSS, Bootstrap, JavaScript, jQuery, GIT, MySQL.

Online Examination Portal – Complete Online Examination System [Link](#)

- **Overview:** Developed a comprehensive online examination portal designed for schools to conduct exams with live proctoring. The system facilitates exam creation, auto-grading, and result generation for teachers and students.
- **Key Contributions:**
 - Implemented live proctoring features, allowing real-time monitoring of students during exams through mobile phone cameras.
 - Developed and integrated REST APIs for uploading student exam sheets and capturing photos for live proctoring, ensuring secure and accurate exam management.
 - Designed and built the user interface using Laravel Blade and Vue.js, providing an intuitive and responsive experience for both students and teachers.
 - Enabled SMS integration for exam notifications and updates, improving communication and engagement.
 - Managed version control and deployment processes using GIT, ensuring reliable and consistent delivery of updates.
- **Technologies Used:** PHP, Laravel, Blade, JavaScript, Vue.js, Vuex, RESTful APIs, GIT, MySQL, SMS Integration.

Online Portal for Enquiry & Booking of Yoga Retreats

- **Overview:** Developed an online portal for booking yoga retreats and yoga teacher training programs. The platform features a user-friendly interface for browsing and booking retreats, optimized for both desktop and mobile devices.
- **Key Contributions:**
 - Created a fully responsive and lightweight website, ensuring a seamless user experience across various devices and screen sizes.
 - Implemented SEO best practices to enhance site visibility and search engine ranking.
 - Integrated payment gateways to facilitate secure and smooth transactions for bookings.
 - Utilized third-party APIs to extend functionality and improve user experience.
- **Technologies Used:** PHP, JavaScript, jQuery, MySQL, Payment Gateways, Third-Party API Integration.
